1 year

### Description détaillée

#### An ultra-short focal length mobile interactive projector

**The Ricoh interactive projector** the Vanity Bag is one of the only ultra-short focal length models in the mobile projector market. Placed at the foot of the projection area, you will be totally free to move around because the ultra-short focal length projection technology eliminates annoying drop shadows.

To increase your freedom of movement, there is no wire connecting the computer to the projector. These are connected using an HDMI connection kit for optimal user comfort.

#### Ready to present in minutes

The different elements of the interactive case are pre-wired to prevent you from wasting time during installation. Simply place the [interactive projector](#) at the bottom of the projection surface, the time to open the case and plug in the plug, you are ready. The [eBeam Edge](#) is fixed to the panel and its calibration is done in a few seconds.

### A fully configurable suitcase

The case can contain beyond the basic elements (computer, mobile interactive board and *video projector*) some of our other mobile solutions such as the [Document viewer Lumens DC 125](#) or the [audio speakers](#) that will fit very easily into the case.

The basic content is also configurable
