Weight with packaging	30kg

## Garantie

Garantie : 2 years.

## Description détaillée

A known and appreciated software suite

Use your finger or the stylus to control the PC!

The main functionalities of the StarBoard software (previously Hitachi):

- Compatible with Windows and Mac
- Customizable floating toolbar
- Handwriting recognition
- Variety of digital inks
- Exporting annotations and notes in different formats
- Direct access to the Internet and to Google Image searches
- Importing Microsoft Office files
- Importing annotations directly from your PC

The physical shortcuts allow to easily access frequently used tools

The function buttons situated on each side of the whiteboards are simple shortcuts to access the most frequently used tools.

An improved tactile technology and easy to use

Use your finger, stylus or any other compatible accessory to navigate easily between your current activities, websites or multimedia content.

## An active tactile that differentiates the finger, the fist and the stylus

Naturally control your whiteboard with multi touch motions – annotate with a finger, change of slide with your fist and use two fingers to erase or zoom in and out.

## The 6 contact points facilitate collaborative work

Thanks to this functionality, 6 users can write and work on the same interactive surface simultaneously.

Main material functionalities

- Use your finger or a stylus to direct the whiteboard
- Big interactive surface
- 6 simultaneous contact points for an easier collaborative work (optionally, up to 10)
- 15 functional buttons for an easier access to frequently used tools
- Light, with a sturdy magnetic steel surface
- Improved mount to make the whiteboard easier to install
- Improved whiteboard surface
- Usable with IWB markers
