Description détaillée

The WePresent WiPG-2000 wireless presentation system allows you to display the image of your device (PC, tablet, smartphone...) on the display of your choice (interactive screen, TV, interactive projector...).

It also transmits interactivity, allowing you to control your device directly via your screen or interactive projector.

Collaborate with others and remotely

Remotely or in person, hold meetings and collaborative presentations with up to 4 screens broadcasted at the same time.

Connection key Plug and Play

Thanks to the USB plug and play key, launch the software to broadcast your screen almost instantly, without any installation required.

Mirroring iOS (AirPlay)

Broadcast the image of your iPhone or iPad wirelessly via AirPlay, for a resolution up to 1080p (Full HD).

Automatic resolution detection

The WePresent WiPG-2000 automatically detects the output resolution.

Data security

The data you broadcast or transfer is protected by a security and encryption system.

Ease and speed of dissemination

Thanks to faster connections and a "Plug and Play" USB key system, broadcast and connect in 10 seconds.

Digital whiteboard

Annotate and draw using the whiteboard or directly on the projected image. You can then save your annotations.
