

Virtual voting license Je Lève La Main 40 students (free) (6 months)

Réf. : JLLM-WEB-40-GRA

The Virtual Voting License "Je Lève La Main"

No need for a physical voting box anymore to play your quizzes thanks to "Je Lève La Main" Virtual. Only one application to download and your smartphone, tablet or computer becomes a virtual voting box.

! Valid for all schools up to BAC.

Description détaillée

A very complete application to create your virtual quizzes

"Je Lève La Main" offers you multiple features in question creation, from multiple choice to single choice, true or false questions or alpha numeric questions.

The possibility of raising the hand virtually

Are you facing a massive audience? Thanks to this function, you will be able to directly identify people with questions and answer them more quickly.

Create a survey? This is possible thanks to "Je Lève La Main"

This allows you to go beyond asking questions to your audience and ask them for their opinion on a particular topic.

ive or not thanks to delayed sessions

Do you want to issue a quizzes/survey that your audience can answer later? The deferred session is the solution to your needs. Your quiz/survey will be available for the time you define and your audience will be able to answer it whenever they want during this period.

Illustrate your quizzes by adding media to your questions

A very useful feature to be able to illustrate the questions in order to facilitate the answers. Different types of media can be associated: a video, a sound, an image, a pdf, a Youtube video ... A very complete panel to be able to vary your sources.

Share your quizzes online

A quiz portal is now available. You will be able to access quizzes created by other people and load your own quizzes to make them available.

Export results

The results can be exported to Excel in order to produce statistics more easily. However, you already have the possibility to see the results of each question live when a quiz is played.

Use "Je Lève La Main" anywhere

"Je Lève La Main" is compatible with all devices, whether smartphone, tablet or computer, both IOS and Android. This makes it much easier to distribute quizzes.
