Warranty: 5 years on site with assembly / disassembly (55")	230,00 €
Warranty: Extension 5 years workshop return (55")	55,00 €

## Description détaillée

### A very solid interactive screen

Thanks to its aluminium frame and tempered glass, our touchscreens are reinforced to withstand daily shocks. Moreover, there is no maintenance to do and that contributes in increasing the normal lifespan of the interactive touchscreen which is 30 years.

### A touchscreen with 20 touchpoints and 40% lighter

The new version of the interactive touchscreen has 20 touchpoints (instead of 10) and weighs only 32 kg (arguably the lightest 55" interactive touchscreen on the market). It is easier to install on all walls.

### An Android core for a faster use

With their Android core, you can use our interactive touchscreen without having to connect a computer first. Start your presentations in no time, without having to wait for your PC to start.

Moreover, the Android operating system makes the use of the screen smoother and easier, thanks to its gestures recognition feature similar to that of a tablet.

### A Wifi module to create a wireless hotspot

With the Wi-fi card of that range of touchscreens, create your personal Wi-fi network and turn your interactive screen into a wi-fi terminal which other people in the classroom or the meeting room will connect to.

### A SAMBA feature to share your files

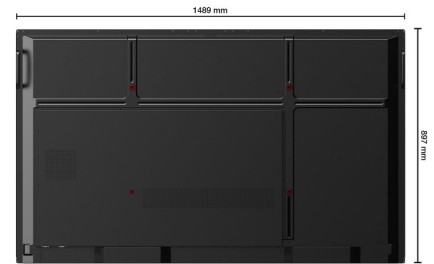

With the SAMBA feature, access to external drives on your corporate network and easily share files among collaborators.

### Available in several sizes and resolutions

The interactive SpeechiTouch is available in different sizes: 55", 65", 75" and 86" so you can equip any room depending on its capacity. That range of touchscreens is exclusively composed of 4K models so to offer you an image resolution of excellent quality.

### lolaos, a great software for annotation

That software is offered with SpeechiTouch touchscreen boards. The lolaos toolbar, easily accessible, is obtained by a click on both sides of your screen to annotate all your presentations. The software offers many additional features to enrich your courses: digital resources, insertion of multimedia contents, writing recognition and many other options. lolaos will allow you, in just a few steps, to build a quality presentation on your interactive touchscreen and to show it to your audience.

VESA : 600 x 400 mm
