Description détaillée

You already have an interactive screen, but no software to collaborate with

With this OPS, make your UHD touchscreen an ideal working support to present, brainstorm, lead meetings or exchange ideas!

The collaborative software suite on Android

With this software package designed for the Android part of your screen, you benefit from a complete and ideal solution to work as a team:

- [Collaborate remotely with Tamashare](#), a videoconferencing solution that provides you with a secure (encrypted) workspace where you can share, exchange or annotate documents.
- [Brainstorm with Draft](#), a software that offers you a space that grows along with your ideas on which you can create post-its, but also insert videos and documents to illustrate your ideas.
- [Introduce with lolaos](#), an intuitive presentation software with a complete toolkit for creating dynamic and powerful slides
- [Facilitate your meetings with Je Lève La Main](#), a quiz software that allows you to integrate videos, soundtracks and PDF documents and analyze precisely the results obtained.

Microsoft Office Suite 2016 and lolaos on PC

In this pack, the PC part of your screen ([module OPS PC](#)) is not to be outdone with the Microsoft Office 2016 suite which includes Word, Excel and PowerPoint. Essential classics to distribute your working documents and work on them in a group.

This PC software suite is complemented by the Windows version of lolaos to create your presentations.

The high-definition webcam

To transform your screen into an accomplished collaborative tool, the kit is completed by a 1080p Full-HD camera to make your videoconferences with Tamashare in complete serenity.
