

Android Touch Screen

SpeechiTouch UHD - 65" with USB C

Réf. : ST-65-UHD-AND-K-005-C

SpeechiTouch interactive touchscreen: 75-inch, 4K UHD image resolution, Android 8

The SpeechiTouch interactive screen runs on Android, making it easier and faster to use, just like a giant touch tablet..

Autonomous, complete, intuitive, it's the perfect touch screen for meeting rooms or small classrooms.

20 touch points, UHD (4k) resolution, Android 8, 16 GB flash memory (ROM) and 3 GB RAM, two powerful speakers (2 x 15W), full connectivity, slot for Windows PC integration ([i5](#) or [i7](#) optional).

You can also configure your interactive screen yourself, with all its accessories.

Fiche technique

Touch Technology	Infrared
Consumption	400W
Supported Operating Systems (OS)	Windows, Linux, Mac
Number of simultaneous hits	20 touch points
Precision	+/- 1mm
Response time	8 ms
Screen diagonal	75"
Display ratio	16 : 9
Brightness	450 cd/m ²
Viewing angle	179°
Refresh Rate	60 Hz
Power consumption (max.)	400W (without OPS)
Contrast Ratio	4000:1
Accessories included	Quick start guide, USB stick (contains user manual), 2 pens, power cable (1.8m), HDMI cable (3m), USB TOUCH cable (3m), remote control (batteries incl)
Standby power consumption	0.5W
Display resolution	4K - UHD (3840 x 2160)
Android version	Android 8
Android Resolution	1080p
CPU	ARM Cortex A73 dual core and ARM Cortex A53 dual core

GPU	Mali G51 Quad core
RAM	3 Go
ROM (internal SSD hard drive)	16 Go
Protective glass	4mm MOHS level 7
Loudspeakers	2x15W
Connectics	3 x HDMI in, 1 x DP in, 1 x VGA in, 1 x AV in, 1 x YPBPR in, 2 x Ethernet (LAN), 4 x USB 2.0 (dont 2 en façade), 2 x Touch, 1 x Audio in, 1 x RS-232, 1 x HDMI out (4K), 1 x AV out, 1 x SPDIF out, 1 x Audio out
Warranty	3 years
Wifi	Clé WiFi disponible en option
Software included	Eshare
Package dimensions (W) x (H) x (D)	1880 x 280 x 1160 mm
Weight with packaging	75 kg
OPS PC	Slot available for a JAE format PC OPS (not shipped)
Accessories included	2 passive pens
Product dimensions without packaging (W x H x D)	1736 x 104 x 1035 mm
Net weight (without packaging)	58 kg
VESA (mm / mm)	600 x 400mm (screw M6)
Stylus	2 passive styli (2 different tips)
Display operating system	Android (possibilité d'OPS Windows)
Compatible operating systems (screen mirroring)	Windows / Mac / Linux

Garantie

Garantie : 3 years return workshop. Des extensions de garantie sont disponibles.

Extensions de garantie disponibles

Warranty: 3 years on site with assembly / disassembly (65")	140,00 €
Warranty: 5 years on site with assembly / disassembly (65")	275,00 €
Warranty: Extension 5 years return workshop (65")	70,00 €

Description détaillée

An Android operating system for ease of use

Thanks to their Android core, our interactive touch screens can be used without having to plug in a computer. So start your presentations in seconds without having to wait for your PC to be turned on.

The **SpeechiTouch** interactive screen features Android 8. Faster and more intuitive, it gives you access to the latest features and optimizations available.

The advantage of using Android on a screen ? [The use is more fluid and simple, the gestures are similar to those you make on a tablet.](#)

22222

The processor installed on the SpeechiTouch interactive screens makes them powerful work and presentation tools on which you can take full advantage of the latest [SpeechiStore](#) applications.

An ultra simple user experience

The SpeechiTouch screen has front ports that provide users with quick access to the most common connectors (USB, HDMI IN, Touch), in addition to the ports located on the edge of the screen.

Some actions on the screen can be performed from its remote control: quick display of the sidebar, screenshot, change of sources, etc. This remote control allows you to remotely control your screen and gain freedom of movement in your classroom or meeting room to energize your presentation session.

A durable and robust interactive screen

Thanks to its aluminum frame and tempered glass panel (level 7 on the Mohs scale, which measures the hardness of minerals), our touchscreens are reinforced to withstand daily shocks.

Ten people can write together on the screen without degrading its performance thanks to its 20 touch points and 10 simultaneous writing points that make the SpeechiTouch screen a collaborative tool par excellence.

In addition, since there is no maintenance to be carried out, the life span of the interactive screens is very long.

Like all of our SpeechiTouch interactive screens, this touch screen is [compatible with all of our brackets](#) (VESA 600 x 400mm) and can be easily mounted on any wall.

A Wifi module to create a wireless hotspot

Thanks to the Wifi module of this touch screen range, create your own Wifi network (2.4GHz or 5GHz frequencies) and transform your interactive screen into a stable and fast Wifi terminal to which people present in the classroom or meeting room can connect.

Available in several sizes in 4K resolution

The **SpeechiTouch** interactive display is available in different sizes :

- [55" Speechitouch](#) interactive touch screen for small spaces
- [65" Speechitouch](#) interactive touch screen for small rooms (classroom or meeting...)
- [75" Speechitouch](#) interactive touchscreen for all room sizes
- [86" Speechitouch](#) interactive touchscreen for large classrooms and meeting rooms.

The different models allow you to equip all your rooms, whatever their size. This range of touch screens is exclusively composed of 4K models in order to offer you an irreproachable image in the highest possible resolution.

The computer directly embedded in the screen.

Do you want to work on a Windows PC without having to make any connections? The OPS module ([i5](#) or [i7](#) optional) will bring you this comfort because it integrates directly into the edge of the screen.

With the Android system, your touch screen turns into a giant touch tablet that gives you access to the same types of applications and uses the same intuitive gestures. With the Windows system, you find your computer's environment and software on an enlarged projection surface.

Innovative application package

Write, an intuitive annotation program

The Note software is installed on the SpeechiTouch touchscreens. From the side toolbar within easy reach from any source, open Write and annotate all your presentations.

This annotation software offers you many features: choice of the color of the tips of your 2 pens, change of background, etc... Write also allows you to quickly export your presentation by email or by QR Code to share it with the participants.

Eshare / iMirror, no Hassle mirroring

Mirroring allows the SpeechiTouch touch screen to display the screen of your tablet, smartphone or PC. Two mirroring applications are installed on the SpeechiTouch screen, Eshare server and iMirror, to easily and in seconds broadcast the content of any device on the SpeechiTouch touch screen.

iMirror for mirroring from iOS devices

For owners of an iOS device, simply use the Airplay app on your device to search for the screen name to start mirroring and display your device's screen on the SpeechiTouch screen.

Eshare for mirroring and more

Eshare allows you to make screen mirroring from devices running Android as well as Windows. This application also allows you to

reverse the broadcast stream and display the content of your interactive screen on your computer or to annotate. To mirror via Eshare, simply install the Eshare app on your device.

VESA : 600 x 400 mm
